EDUCATIONAL INNOVATION

The Pedagogical model, renewed and approved by the Dicastery for Culture and Education, integrates technology into the educational process for better integral development of students. In continuous relationship with the teacher, and supported by new tools, the student is the protagonist active in his own learning.

APRA INNOVATION AS A HOLISTIC PERSPECTIVE

At APRA, you will have the opportunity to experience an integral and constantly updated academic path that offers you the appropriate pedagogical and technological tools to integrate knowledge, traditions and ensure personalized attention at the service of the positive transformation of society. As Pope Francis exhorts us, let us together undertake a «courageous cultural revolution» at the service of the Church's evangelizing mission.
