GENENRAL INTRODUCTION	15
CHAPTER 1 - PRENATAL DISABILITY: ETYMOLOGY, DEFINITION AND MODELS	31
1.1. Etymological meaning of Prenatal disability	31
1.1.1. Definition of prenatal disability	34
1.2. Disability and some conceptual models.....	37
1.2.1. The medical-scientific model	39
1.2.2. Socio-political model	42
1.2.3. The juridical model	46
1.2.4. The tragedy/charity model	50
1.2.5. Religious/moral model.....	51
1.2.6. Economic model	52
1.2.7. Empowering/rehabilitation model	52
1.3. Some particular concepts surrounding prenatal disability in Nigeria	55
1.3.1. Socio- cultural/ethnics concept	58
1.3.2. Socio-religious concept.....	64
1.4. The Magisterial teachings on disability	71
CHAPTER 2 - GENERAL AND PARTICULAR CAUSATIVE FACTORS OF PRENATAL DISABILITY.....	77
2.1. General causative factors – determinants of health	77
2.1.1. Biomedical risk factors	84

2.1.1.1. Genetic risk factors - hereditary.....	85
2.1.1.2. Chromosomal abnormalities	90
2.1.1.3. Sex-linked/ x-linked/single-gene abnormalities	95
2.1.1.4. Multi-factorial disorders or inheritance causative factors ...	98
2.1.1.5. Other causative factors.....	104
2.1.1.5.1. Maternal/fetal environmental factors.....	104
2.1.1.5.2. Teratogens and mutagens factors	108
2.2. Particular causative factors and determinants of health in Nigeria..	134
2.2.1. Socio-cultural factors as determinants of health	135
2.2.1.1. Consanguinity marriages	136
2.2.1.2. Early marriage and giving birth to many children	138
2.2.1.3. Seclusion/exclusion or purdah	141
2.2.1.4. Female genital mutilation or circumcision	144
2.2.1.5. Women excessive labour/domestic violence.....	149
2.2.1.6. Cultural food taboos.....	151
2.2.2. Socio-economic factors as determinant of health	155
2.2.2.1. Poverty as determinant of health	155
2.2.2.2. Poor quality of care as determinant of health	159
2.2.2.3. Lack of physical and social mobility as determinant of health	160
2.2.2.4. Illiteracy as determinant of health.....	160
2.2.3. Socio-political or governmental factors as determinants of health.....	161
2.2.3.1. Lack of adequate primary healthcare system and services	161
2.2.3.2. Outcome of unsuccessful abortion – when abortion fails .	167
2.3. Epidemiology and prevalence of prenatal disability in Nigeria.....	173

**CHAPTER 3 - WHY PREVENTING PRENATAL DISABILITY:
NEGATIVE AND POSITIVE MOTIVATIONS 183**

3.1. Negative Views or motivations for preventing prenatal disability ..	183
3.1.1. Eugenic Arguments	184
3.1.2. Family burden arguments	189

3.1.3. Women rights and autonomy arguments.....	193
3.1.4. Societal burden arguments	198
3.1.5. Quality of life and doubts of being human or fully human	203
3.1.6 Avoidance or elimination of suffering.....	212
3.2. Positive views or motivations for prevention of prenatal disability	219
3.2.1. ‘Prevention is better than cure’	220
3.2.2. The proof of human status of unborn - epigenetic process	222
3.2.3. To avoid maternal and neonates/infants morbidity and mortality.....	229
3.2.4. Avoidance of burnout among Parents/care-givers	237
3.2.5. Avoidance of socio-political inequalities – labeling/discrimination	243
3.2.6. To uphold and promote health and education	251

CHAPTER 4 - PREVENTION AND ITS ETHICAL INTERVENTIONS 255

4.1. Brief analysis and analogy	257
4.2. Concept and definition of prevention in different arena	258
4.2.1. The concept of prevention in cultural/ethnics perspective.....	261
4.2.2. The concept of prevention in socio-political perspective	262
4.2.3. The concept of prevention in medical perspective.....	263
4.2.4.Prevention according to WHO/global health	266
4.3. Prevention of prenatal disability in Nigeria	269
4.4. Prevention and eugenics	272
4.4.1. Prenatal diagnosis as preventive measure for prenatal disability.....	273
4.4.1.1. Invasive techniques of prenatal diagnosis.....	281
4.4.1.2. Non invasive techniques of prenatal diagnosis.....	283
4.4.2. Abortion as a preventive measure for prenatal disability.....	285
4.4.2.1. Nigerian law on abortion: its ethical and moral dilemma..	298
4.4.3. Artificial Techniques of Procreation as preventive measure for prenatal disability.....	305
4.4.4. Sterilization as preventive measure for prenatal disability	308

4.5. Ethical principles for prevention practices	318
4.6. Modality and classification of ethical prevention of prenatal disability.....	334
4.6.1. Primordial prevention	336
4.6.2. Primary prevention of prenatal disability	337
4.6.2.1. Reproductive health education	338
A. Pre-marital, pre-pregnancy planning and care	339
B. Addressing maternal and paternal health and lifestyle risk factors.....	342
C. Maternal and paternal infections/injuries and diseases management	343
D. Improve maternal dietary	345
E. Managing maternal weight/physical activity.....	349
F. Awareness of natural family planning of ovulation method ...	353
4.6.2.2. Other primary prevention interventions.....	354
A. Education/Awareness and Dialogue with the population on Harmful cultural practices.....	356
B. Government partnership with the traditional birth..... attendants/periodical control.....	364
C. Improved socio-economic factors of pregnant women	367
D. Improved Healthcare infrastructures, adequate and trained medical personnel	370
4.6.3. Secondary prevention of prenatal disability	375
4.6.3.1. Pregnancy care and antenatal visits	377
4.6.3.2. Early diagnosis and treatments	381
4.6.4. Tertiary prevention of prenatal disability	383
4.6.4.1. Rehabilitation and empowerment programmes	384
4.6.4.2. Provision of mobility aids for disabled children.....	388

CHAPTER 5 - FACTORS FOR THE ACTUALIZATION OF ETHICAL PREVENTIONS: RECOMMENDATIONS/PROPOSALS.....389

5.1. Need for the collaborative action of global health and Nigeria government/public healthcare.....	389
---	-----

5.1.1. Etymology and definition of global health.....	392
5.1.2. Global health taskforce: mission, value, vision	402
5.2. Nigeria abide by the standard of global health	413
5.2.1. Actualization of the time-bound targets: MDGs and SDGs.....	414
5.2.2. Intensify health care surveillance in the rural areas and in the cities by experts.....	419
5.2.3. Provision of mobile health clinics in Nigeria, especially in the rural areas.....	424
5.2.4. Need for continuous awareness and education of the citizens on determinants of health.....	427
5.2.5. Government subsidize with the low income families	431
5.2.6. Provision of adequate pediatric or neonatal palliative care centers	439
5.2.7. Solidarity with the families of disabled children	441
5.3. Need for a committee of bioethicists, ethicists and geneticists to be consultants in the healthcare centers and hospitals	446
GENERAL CONCLUSION.....	449
SELECTED BIBLIOGRAPHY	457
