

2022 - 2023

In collaboration with

TRAINING COURSE IN NEUROBIOETHICS

VI EDITION

Neurobioethics and the Metaverse

IN THE FIFTH INDUSTRIAL REVOLUTION KNOWLEDGE IS POWER, BUT WISDOM IS DEVELOPMENT. DATA IS NOT ENOUGH, WE NEED ETHICS.

PRESENTATION

The Course will offer a critical examination of scenarios related to the so-called "Metaverse": from the developments and medical-clinical applications of virtual reality and augmented reality (in particular in the neurological, neurosurgical and psychiatric context), to the philosophical-theological and neuroethical reflections on the same technological tools.

The year 2023 marks the 50th Anniversary of the introduction, in a scientific context, of the neologism "Neuro-Ethics" by the neuropsychiatrist Anneliese Alma Pontius. After a 13-year research experience, the Neurobioethics Research Group will offer a series of 10 seminars and round tables from September 2022 to June 2023, (including the March conference within the World Brain Week promoted by the DANA Foundation) on the technological, neurological, neurosurgical, psychiatric, psychological, ethical, bioethical, legal and theological aspects related to the concept of "Metaverse".

The main purpose is to become aware of the anthropological, ethical, legal, health and social consequences and repercussions of such virtual and augmented reality uses and interventions for human life.

Special emphasis will be given to the consideration of issues related to the principles enshrined in the 2005 UNESCO Declaration on Bioethics and Human Rights. This sensitivity will specifically touch on issues related to the limit, dignity, identity and value of the human body.

AUDIENCE

The Training Course is aimed at those who want to become more aware of the development and application of emerging technologies to human beings; in particular: politicians, engineers, doctors, bioethicists, philosophers, theologians, teachers and formators.

STRUCTURE

A monthly meeting on Fridays.

DATES: September 23, 2022 - June 23, 2023

SCHEDULE: a monthly session from 5 pm to 7 pm

CREDITS: 3 ECTS

COSTS: 350 euros (enrollment before 26/09/2022)
400 euros (enrollment before 31/10/2022)

LANGUAGE: Italian with simultaneous translation in English
